### Conditions for Bio Suisse certification

Dear Sir or Madam

Please note the conditions and comments enclosed in this letter. Compliance with these conditions must be checked and confirmed by your inspection body during the next inspection.

1. Individual Farmer F-E04: Areas dedicated to the enhancement of biodiversity must constitute at least 7% of the farming operation's utilized agricultural area (see appendix). The areas must be described and quantified in the inspection report. Currently, 6.5ha = 6.84% are present.
2. Please take notice of the new Bio Suisse regulations: Bio Suisse certified products must be declared as "BIOSUISSE ORGANIC" on containers, delivery notes and invoices (see appendix).

Please see the summary of the Bio Suisse Standards and the information notes issued by International Certification Bio Suisse AG.

In order to ensure continuous certification without any breaks, please make certain that all documents from your next inspection are submitted to us without delay.

Best regards,

Operation No.: 145164

International Certification Bio Suisse AG

Nicole Camenzind  
Director of Certification
